Abstract: *BrainBazaar, a website that provides students with study materials like notes, model answers and question papers as well as projects for diploma courses, has an impact on students' learning, according to this research paper. Whether BrainBazaar helps students to succeed in their classes, keeps them motivated and leaves them with more energy to study. " Our approach involves using BrainBazaar to ask students and adults about their experiences, as well as completing surveys. According to our research, BrainBazaar facilitates independent learning, encourages critical thinking, and helps students retain their knowledge. ' It appears that BrainBazaar is a valuable addition to standard classroom instruction by offering well-designed and accessible study resources. Additionally, we discuss the potential benefits of online platforms like BrainBazaar for teachers and policymakers. This investigation contributes to the understanding of how digital study resources can enhance education for diploma students.*

Keywords: BrainBazaar, Study materials, Diploma courses, Learning outcomes, Classroom learning, Online platforms, Education improvement
