Abstract: *The term "feminism" refers to a broad spectrum of political concepts, philosophies, and social movements that are united in their quest to define, establish, and realize gender equality in the political, economic, personal, and social spheres. The fundamental goal of feminism is to provide opportunities for women to have equal access to resources that are ordinarily freely available to males, as well as to equality and justice for women in all areas of life. The emergence of feminism represents a fresh perspective on the global rights of men and women. No matter in philosophy, culture, society, politics, economy, etc., the research on feminism is of great significance. Given the variety of psychosocial and cultural conceptions of femininity, feminism is, in fact, a genuine attempt to investigate, comprehend, and elucidate. However, by examining a few seminal works in the field of feminist literary theory, this study aims to trace the theoretical origins of the movement and define some fundamental assumptions and principles of feminism*
