

Quality Enhancement of Teacher Education Institutions in Kerala

Dr. Remmiya Rajan P.

Assistant Professor, Zamorin's Guruvayurappan College, Kozhikode, Kerala

Abstract: All over the country, the demand for quality of higher education is rapidly increasing. Unprecedentedly, at the higher education level, the students are being trained to demand high-quality education in colleges and Universities. Even though Kerala is giving more importance to higher education the quality of higher education has been questioned. To meet the demand for quality education, a large number of students are studying at foreign Universities. The quality of education depends upon the efficiency of the teacher. Hence it is often said that the teacher is the pivot of the whole educational system. The quality of the teacher is directly linked with the quality of Secondary Teacher Education Institutions..

Keywords: Quality, Enhancement, Teacher Education Institution
