Abstract: In the 21st century, technology has become an integral part of our lives. A green field where mobile integration with technology is helpful for own safety and crime reporting. So, considering this, this paper discusses an operation for the citizens so that they have some redundant safety or we can say they can have their safety in their own hands. In this application, users can send SOS calls and SMS to one of their connections as well as to the registered volunteers. They can also partake in their live position through the application. So, the basic motive of this application is assurance of the safety of the users.

Keywords: APIs, SOS, Security, Volunteers.
