Abstract: *Event management is a crucial part of organizing successful events, and with the advancement in technology, mobile applications have become a popular tool for event management. In this paper, we present our research on the development of an Android application for managing college events. Our application aims to simplify the event management process, making it easier for organizers to plan, promote, and execute events. We have conducted a thorough analysis of the existing event management applications to identify the gaps and shortcomings. Based on our research, we have designed and developed an application that incorporates the essential features required for event management. We have also evaluated the application's effectiveness by conducting user testing, and the results indicate that our application significantly improves the event management process*

Keywords: Event Management, Android Application, College Events, Execution.
