**Abstract:** *To better the quality and accessibility of education, this research paper examines recent developments in India's educational system by highlighting significant programs, laws, and reforms that have been put in place. In this paper, several topics are examined, such as curriculum development, technology integration, teacher preparation, inclusive education, and skill development initiatives. The study demonstrates how these developments have affected student learning outcomes, equity in education, and the overall growth of the Indian education sector by reviewing pertinent research literature and policy documents.*

**Keywords:** Technology integration in India's educational system. Artificial intelligence in monitoring, evaluating, and education.
