Abstract: *This paper investigates the widespread use of technology in education and its effects on teaching and learning procedures. The study offers a comprehensive analysis of the existing research literature, highlighting the various ways in which technology has altered traditional educational practices. It examines the benefits and challenges of using technology in the classroom, as well as the efficacy of online resources. The paper also provides recommendations on how stakeholders, policymakers, and educators can most effectively integrate technology into the educational system.*

Keywords: Technology in the classroom, Technology in education, and its use in education
