Abstract: *This research paper looks at how India's education system has changed in recent years. It focuses on key initiatives, policies, and reforms that have been put in place to improve the quality and accessibility of education. The paper looks at several different topics, such as curriculum development, integrating technology, teacher training, education for everyone, and skill development programs. The study looks at relevant research papers and policy documents to show how these changes affect how well students learn, how fair education is, and how the education sector as a whole develops in India.*

Keywords: India's education system and how it uses technology. AI in education, testing, and keeping an eye on things
