Abstract: *This research paper investigates the recent improvements that have been made to India's educational system, with a particular emphasis on the key initiatives, policies, and reforms that have been put into place to improve both the quality of education and its accessibility. The paper investigates a variety of topics, such as the creation of educational curricula, the incorporation of technological elements, the training of educators, inclusive education, and programs to develop skills. The purpose of this study is to highlight the impact that these advancements have had on student learning outcomes, equity in education, and the overall development of the education sector in India by conducting a review of relevant research literature and policy documents.*

Keywords: The educational system in India, incorporation of technology. The use of artificial intelligence in teaching, assessing students, and keeping tabs on their progress
