**Abstract:** *This study examines the widespread application of technology in educational settings and how these applications impact the teaching and learning processes. The study provides a comprehensive analysis of the research literature that already exists, highlighting the many different ways in which technology has altered the methods that have traditionally been used in educational settings. It investigates the advantages and disadvantages of incorporating technology into educational settings, as well as the usefulness of various online resources. In addition to this, the paper offers suggestions as to how stakeholders, policymakers, and teachers can most effectively incorporate technology into the educational system.*

**Keywords:** classroom technology, technology's role in education, and technology's application in the classroom
