Abstract: *This research paper examines the most significant reforms, policies, and initiatives that have been put in place to raise the standard and accessibility of education in India. The paper examines some topics, including teacher preparation, curriculum development, technology integration, inclusive education, and skill development initiatives. The study emphasizes the impact of these developments on student learning outcomes, equity in education, and the overall development of the education sector in India by reviewing pertinent research literature and policy documents.*

Keywords: Integration of technology into India's educational system. Artificial intelligence for evaluation and monitoring in education
