**Abstract:** *The extensive use of technology in the educational system and its effects on the teaching and learning processes are examined in this research paper. The study offers a thorough analysis of the body of research literature already published, highlighting the various ways that technology has changed conventional educational practices. It explores the advantages and difficulties of incorporating technology into the classroom, evaluates the potency of online resources, and talks about how technology can support more equitable access to education. The paper also offers suggestions for stakeholders, policymakers, and educators on how to best integrate technology into the educational system.*

**Keywords:** Technology in education, Education with technology, the technology uses in education
