**Abstract:** *This study paper looks at how technology is used a lot in schools and how that affects how teachers teach and how students learn. The study does a full analysis of the research that has already been done and released. It shows how technology has changed traditional ways of teaching. It talks about the pros and cons of bringing technology into the classroom, how effective online tools are, and how technology can help make education more accessible to everyone. The paper also gives ideas to stakeholders, lawmakers, and teachers on how to best use technology in the education system.*

**Keywords:** Technology in the classroom, using technology in education: how technology is used in education.
