Abstract: *A traditional library only undergoes a transformation into a digital library. In the twenty-first century, the concept of digital libraries first appeared. Virtual libraries, wall-free libraries, electronic libraries, and digital libraries are all interconnected. In this study, we need to discuss the idea of a digital library together with its challenges and objectives. Use the digital library to access information on anybody, anywhere, at any time, and in any format.*

Keywords: Digital library, Information retrieval, Metadata
