Abstract: *The performance of a teacher is an important criterion for higher education. The quality indicators of performance for teachers are intelligence, knowledge, interpersonal skills etc. Which varies from one man or woman to another. It is thus important to know which qualities are important for successful performance of a teacher. The student as the major stakeholder in higher education can better understand the desired outcomes. This paper attempts to examine the important qualities of a teacher in perception of students of higher education. The study also attempts to find out the impact of the teachers' qualities on various aspects for students. The scope of the study is extended to perception of both graduate and post graduate students. The data will be analysed using various statistical tools and techniques. This study will be helpful to understand the current scenario of higher education in India based on the perception of students. The findings of the study may be utilised for improving the existing system.*
