Abstract: *This study is carried out to explore the emerging technologies and their implications for library services and operations. Libraries have always been a cornerstone of education, research, and community engagement, and their importance continues to grow in an era of rapid technological change. Emerging technologies are transforming industries, reshaping business models, and influencing how we interact with the world. In the digital era, these technologies are not just enhancing efficiency and productivity; they are fundamentally altering how organizations operate and how people live, work, and communicate. The need for these technologies in the digital era is critical for several key reasons.*
