Abstract: Any disorderly behaviour that has the effect of taunting or treating a student rudely, which annoys or is likely to annoy, injure, or arouse fear in a junior so as to adversely damage the junior's psyche, is referred to as ragging. Ragging is a worldwide phenomenon that goes under a variety of names, including hazing, fagging, baptême in French, doop in Dutch, and mopokaste in Finnish. During the 8th century BC Olympics in Greece, there were the first occurrences of ragging that were documented. The victims of ragging have repeatedly been linked to a wide range of physical, behavioural, emotional, and social issues. because it encompasses the physical, emotional, and social exploitation of not only a person but also of his or her environment, it is a public health issue

Keywords: Bullying, hazing, fatalities, and news monitoring
