**Abstract:** *Under the WTO regime, commerce education has had a significant impact. Commercial education is a type of training that, while contributing to the fulfilment of the overarching objectives of education at any given level, has as its main goal the preparation of individuals to begin a career in business or, after beginning one, to perform more effectively in that career and advance from their current levels of employment to higher levels. The only way to accomplish the goals of commerce education is to reform the system on a qualitative level. The results of commerce education should be multifaceted and completely competitive on a worldwide scale. But we must acknowledge that graduates in the field of commerce lack practical knowledge. A requirement of the age is for commerce education to be practical. The industry's opinion of commerce education in India is examined in the paper analysis.*

**Keywords:** Occupational Ability, Perception, Commerce Education, and Commerce Curriculum
