**Abstract:** “Home Bakery and Delivery Management System” is a software solution designed to assist and streamline the operations of a home bakery business. It provides an integrated platform to manage various aspects of the bakery, including inventory, orders, customers, and finances. The Home Bakery and Delivery Management System simplify and automate essential bakery management tasks, optimizing efficiency, and enhancing customer satisfaction. By centralizing operations and providing a user-friendly interface, the system helps bakery owners focus on delivering high-quality products while efficiently managing their business. The website may utilize various technologies and frameworks, such as React, HTML, CSS, JavaScript, and server-side languages, to create a seamless and engaging user experience.

**Keywords:** HTML, CSS, JavaScript.
