Abstract*: To teach speaking holistically and comprehensively, it is valuable for teachers to be knowledgeable about what speaking competence involves and how different aspects of speaking competence relate to each other. Johnson (1996, p. 155) describes speaking as a "combinatorial skill" that "involves doing various things at the same time". The presents a model of second language speaking competence that comprises knowledge of language and discourse, core speaking skills, and communication and discourse strategies. Learning to speak in a second language involves increasing the ability to use these components in order to produce spoken language in a fluent, accurate and socially appropriate way, within the constraints of a speaker's cognitive processing.*

Keywords: English, Listening, Speaking, writing etc
