

A Study on Sustainable Business Practices and Impact of Financial Management

Ms. Jeenal Jain

Assistant Professor, Department of IT and CS

Nirmala Memorial Foundation College of Commerce and Science, Mumbai, Maharashtra, India

Abstract: *The consequences of this study show how significant monetary administration is to the manageability cycle. The exploration depends on the need of distributing manageability reports, the need of basing capital planning and other pertinent monetary choices on corporate supportability, and the need of estimating and diminishing maintainability gambles. To look at how the ideas really work practically speaking, the connection between monetary development and supportability is inspected, alongside a correlation of the Islamic and Western monetary model frameworks. Considering non-monetary and macroeconomic perspectives, the examination reaches a resolution with the production of expectation model direction for the location and assessment of trouble in different firms for different closely involved individuals.*

Keywords: business risk, sustainability, and financial management
