

# Comprehensive Analysis on the Various Aspects of Supply Chain Management

**Prof. Gaurav Mishra and Pandit Bandu Dagdu**

Jai Bharat College of Commerce (Night), Mumbai, Maharashtra, India

**Abstract:** *Any organisation needs supply chain management to function. An overview of current innovations in supply chain management is given in this article. A discussion of the difficulties involved in managing supply chains follows the presentation of several definitions and fundamental supply chain management concerns in the first part. Next, we look at the main inefficiencies brought on by subpar supply chain management. The conclusion includes a brief evaluation of prior research efforts and a consideration of upcoming supply chain management challenges.*

**Keywords:** Supply chain management, operations management, sourcing, outsourcing, procurement, competition, information technology, globalisation, sustainability, manufacturing, service.
