**Abstract:** *The Special Library is a never-ending network of information kiosks known as the Specials' (Special) blood vessels. Topic/Special Customer Base). It has been discovered that a nation's rate of advancement primarily depends on its educational system and rate of scientific activity. In this regard, the Special Library is essential to research projects aimed at advancing and developing the country. Concurrently, positioning the specials by the use of IT/ICT tools and techniques, as well as information literacy methods and means, is imperative for both the personal and societal development of the nation. The current paper focuses on particular aspects of libraries that pertain to needs, kinds, services, roles, and activities in the past, present, and future. Future direction that prioritizes the current situation. Three fundamental components comprise the projected 3K2CM model, which graphically depicts the functions and services of a special library: Knowledge Content, Knowledge Creation, and Knowledge Management. In the twenty-first century, special and research libraries are essential for a number of reasons. Particulars these libraries are vital for academics, professionals, and researchers looking for in-depth. They frequently protect rare historical manuscripts, artifacts, and documents, which helps to preserve cultural heritage. Special and research libraries give users access to the most recent issues of scientific journals, which fosters creativity and cutting-edge research. By acting as gathering places for specialists from various fields, they promote interdisciplinary collaboration by fostering new ideas and insights.*
