

# A Study on the Uses of Data Structure for Analysis and Decision Making

**Ms. Swiddle D'Cunha**

I/C Principal

Nirmala Memorial Foundation College of Commerce and Science

**Abstract:** *This article expects to give some understanding on the utilization of information structures in the space of data recovery. Given the rising craving and need for sharing and inspecting information, data recovery is a field of examination that is making strides. For quite a while, information structures have been the focal point of exploration. age in the software engineering field. Given the outstanding development of information, it is significantly more essential to have successful information structures..*

**Keywords:** Data structures, Information retrieval
