Abstract: *Healthcare is very important in our day-to-day lives. It is very important to take proper precautions and medicines to protect your health as early as possible before it gets serious. It is not possible that the doctors are available 24 hours a day to assist and guide the patient. The virtual clinic doctor was available 24 hours a day to assist patients and guide them on how to recover from the symptoms they were facing. The main aim of making this AI healthcare chatbot is to assist and guide more than one patient at a time and reduce the cost and time for patients*

Keywords: ChatBot, Healthcare, Virtual Clinic, Artificial Intelligence, Virtual Doctor
