Abstract: *The purpose of the "College Placement Recruitment Management System" is to improve and expedite the placement procedure in educational establishments. This project aims to design a complete system that automates and streamlines the recruiting workflow in response to the increasing complexity of handling placement activities. The technology makes it easier for students, recruiters, and administrators to communicate with each other in a smooth and user-friendly manner. The College Placement Recruitment Management System's methodical study, design, and implementation are described in this project report. With capabilities like user registration, job posting, application submission, interview scheduling, and result administration, the system meets the varied needs of its users.*

Keywords: College Placement, Career Services, Student Placement, Application Tracking, Interview Scheduling, Result Management, and User Registration
