Abstract: *This research paper delves into the intricate relationship between economic and social factors and their impact on women in the banking industry. The study aims to provide a comprehensive analysis of the challenges and opportunities faced by women working in the banking sector, considering the evolving landscape of both economic and social dimensions. Through a combination of quantitative and qualitative research methods, this paper seeks to identify the factors influencing gender disparities in the banking industry and propose recommendations for fostering a more inclusive and equitable work environment.*
