Abstract: *The National Education Policy (NEP) was approved in July 2020. It was a major breakthrough in the educational system of India. NEP has replaced the existing education system which was formulated in 1986. NEP-2020 is based on the 5+3+3+4 educational framework. NEP is an effort to revolutionize the education system of the country by bringing in more flexibility and openness in the education system. It has been more than three years since the NEP came into existence. Governing bodies like UGC have been trying to implement it at the grassroots level. At the same time Universities, Institutes, and Colleges are also trying hard to fit NEP in the existing scenario. In this study, we have tried to find out whether there is a basic understanding of the National Education Policy. We have also tried to find out the level at which NEP has been implemented in educational institutions. A diverse group of educationists from government and private educational institutions of India have been covered in this study. Data was acquired via Google Forms to obtain accurate and authentic information from the persons involved. The results of the study will help in understanding the current status of the implementation of NEP in educational institutions.*
