Abstract: This paper studies India's performance and progress towards Sustainable Development Goals (SDGs) in 2019 and 2020. The SDG progress of India's states and Union Territories shows wide disparities. Bihar ranks lowest at 52, Kerala consistently scores high at 75, while Mizoram notably improves from 56 to 68. Some states show significant strides, while others lag, signaling areas requiring attention. This paper will help policymakers to improve SDG's performance. Also, this study will further add to the sustainable development literature in the context of India.

Keywords: Sustainable development
