Abstract: *The real estate sector has been going through corporatization and professionalization and perceived as a key area adding to the financial advancement of the country. Worldwide financial situation, a stoppage in the homegrown financial conditions, escalation in input expenses and contentions over land securing are the variables liable for slow development in this industry in the year 2011. The creator believes that an unwinding in outer business getting norms, new assembling and telecom arrangements would restore worldwide financial backer certainty. The review infers that Administration of India's new choice to permit 51% FDI in multi-brand retail is likewise expected to help the land business in the country as far as helping advancement of new shopping centres*
