**Abstract:** *The rise of digital technology has brought many benefits to society, but it has also created new challenges, particularly in the area of cybersecurity. Cybercrime has become increasingly prevalent issue in recent years, with cyber criminals using the internet to commit a wide range of illegal activities, including identity theft, fraud and cyberbullying. This has created a legal challenges for governments, as they attempt to keep pace with technology advancements and the evolving nature of cybercrime. Cyberspace is a virtual world or online world. It is an artificial world created by computers or internet enabled devices or component to communicate. There are two categories of cybercrime firstly property crime hacking, spamming, identity theft, fraud and copyright infringement and secondly crime against the person is child pornography, sexual abuse of children, cyber stalking, cyber bullying. The aims of the study are to discuss the role of government and policy makers for the rehabilitation of victims against cybercrimes. The paper will suggest some measures for the holistic development and security of children.*

**Keywords:** children, cyberspace, cybercrime, intervention, psychology, investigation, prosecution, online privacy
