Abstract: Nowadays there are many online services which are on trend that give much benefit to user. This application named as tractor hiring application for farmers is a rental service in which the farmer arrives to request a hire of a rental unit. It is more convenient than carrying the cost of owning and maintaining the unit. There are several problems occur on farmer like they are not able to hire a tractor and equipment of agriculture for farming in nominal amount or they do not find tractor easily. In another case, sometimes farmers are unaware about the price of the tractor and other agricultural equipment; such that tractor owner misguide the farmers very easily and cheat them by taking extra money. The solution for solving such various problems occur on farmers regarding to agriculture can be overcome using this application. Therefore with this new method the process will be more efficient and safety of hiring tractor as well as equipment is secure. It is also the best way to increase the quality of agriculture management, productivity and can reduce the time constraints for farmers.
