Abstract*: Exams are a scary topic for students and teachers to discuss. The successful operation of the exam depends on administrators establishing the system and establishing a good working relationship with the exam center administrator. Communicate with staff and students simultaneously to ensure everyone is working towards the same goal. Automated systems will reduce all the challenges associated with test management. Academia ERP is a comprehensive system that provides an exam model that includes all activities related to exam management, from direct receipt of registration forms and exam documents to completion of results and hard copy proofing and data analysis. The exam module contains all the necessary information students need to register for the exam. The module is linked to the student database; Therefore ID/name/registration etc. Just fill in the fields. It helps in keeping all the necessary information about the student. Exam Module for Academia provides the following for easy and effective exam management in education - Study or Exam Module ERP followed by Systematization Exam Management Module in Academia is the best automation system that automates and facilitates the quality of planned and executed tests; Make the testing process efficient and paperless. Academia's Exam Management Portal helps you complete the entire exam process, from pre-planning (like creating exam papers, exam schedules, and scoring rubrics), to managing materials and dispatching proctors. Automated systems are designed to manage the access rights of different users to prevent unauthorized users from abusing and controlling legal and legal information as well as many other information, including reviews that are not only for informational purposes. The project aims to create an effective platform for process management. As we mentioned above, it has different modules. Student and test data are stored in the database.*

Keywords: exam management.
