**Abstract:** *Effective decision-making is integral to organizational success and operational efficiency. This research paper examines the decision-making processes within organizations to assess their effectiveness. Using a mixed-methods approach that combines qualitative and quantitative research, the study explores various decision-making models, evaluates the criteria and tools used, and assesses the impact of decisions on organizational performance. Key findings reveal insights into decision-making practices, highlight areas for improvement, and provide actionable recommendations for enhancing decision-making processes. The study contributes to a better understanding of how organizations can optimize decision-making to achieve strategic and operational goals.*

**Keywords:** decision-making.
