**Abstract:** *A nations education system is crucial for its development. The Indian Government and corporate sector have taken steps to improve educational standards, but more efforts are needed. This paper explore the role of corporate social responsibility (CSR) in promoting quality education in India, aligning with sustainable development goal which aims to ensure equitable education for all. With a focus on initiatives led by Indian corporations, this study examines how CSR programs contribute to bridging the educational gap, particularly in underserved and rural communities. It highlights key corporate initiatives, such as infrastructure development, digital learning platforms, scholarships, and teacher training programs. By analyzing the impact of these programs, the paper evaluates their effectiveness in addressing educational challenges, such as inadequate resources and access disparities. Furthermore, the research discusses the role of technology in enhancing the scope and reach of education. The findings suggest that corporate involvement in education is a significant contributor to improving literacy rates, reducing inequality, and empowering future generations..*
