Abstract: *Since natural medicines are thought to be safer and have less adverse effects than synthetic ones, they are more widely accepted. Global demand for herbal formulations is rising. The creation and assessment of a herbal face wash with neem leaf aqueous extract is the focus of this study. lemon juice, honey, aloe vera gel, turmeric oil, and sodium lauryl sulfate, rose water, glycerin, xanthum gum, and methyl paraben ,While there are numerous topical herbal acne treatments available in the market, we suggest creating pure herbal formulations devoid of any artificial component. According to published reports, the plants have strong antibacterial, antioxidant, and anti-inflammatory properties.*
