Abstract: *The IT sector has had significant growth over the past two decades, and this growth is expected to continue since the 1990s. With its highly skilled workforce and state-of-the-art infrastructure, the IT sector has experienced substantial growth in several regions of the country. The IT sector makes a significant contribution to the economy, although agriculture holds a strong position as the largest employer in the country. In the new millennium, this industry has become a major driver of growth for the country, hitting significant milestones in terms of revenue growth, employment generation, and foreign exchange earnings.*
