Abstract: *Teachers play a pivotal role in preserving and transmitting Indian culture and its eternal values. In the context of the National Education Policy in India, which emphasises integrating Indian Knowledge Systems into education, this paper explores how teachers are crucial agents in nurturing and disseminating these cultural values. The study investigates the impact of effective teacher education in equipping educators with the skills, knowledge, and attitudes necessary to uphold Indian cultural values. It examines the role of teachers in fostering societal harmony and individual well-being through the transmission of enduring values embedded in Indian culture. .By analysing the methods and strategies employed in teacher training programs under the NEP, this research aims to highlight how educators can effectively instil these values in students, thereby contributing to a culturally enriched and harmonious society.*
