Abstract: *The "Travel and Tourism Application" is designed to offer a comprehensive solution for travelers seeking an enhanced and seamless travel experience. The application integrates multiple essential features to ensure users have access to everything they need for their journey. It includes a Guide List that provides a curated list of professional guides, offering valuable insights and assistance during the trip. The Transport System feature helps travelers plan their journeys efficiently with information on available transportation options, such as buses, taxis, and trains.*

In addition, the Notification System ensures users stay informed with real-time updates on travel schedules, discounts, and local events. The Hotel Booking feature allows users to find, compare, and book accommodations based on preferences like price, location, and amenities. To enhance the travel experience, the Explore Places section highlights nearby attractions, while Place Descriptions provide in-depth details on the culture, history, and significance of various destinations.

Finally, the Guide Contact feature allows users to easily connect with their chosen guides for inquiries, assistance, or additional information. This all-in-one platform is designed to improve the convenience and enjoyment of travelers, making it a valuable tool for both first-time tourists and experienced explorers..
