Abstract: *For the purpose of present study (n= 100) parents of martial art players were selected as subjects from different C.B.S.E and State board schools of Bhandara District. Samples were selected by using Random sampling method. Study was delimited to parents of players participating in Judo and Taekwondo martial arts only. 50 parents were selected from state board and 50 subjects were selected from C.B.S.E schools of Bhandara district. For the collection of the data structured questionnaire was used and collected responses were present after statistical analysis.*
