Review Paper on" 3D Printing and its Applications in Various Field"

Mr. D. S. Welkar and Prof. Vilas Dhagate

Department of Mechanical Engineering Guru Gobind Singh Polytechnic, Nashik, India

Abstract: 3D printing is an additive Manufacturing process and is a modern technology that enables the creations and production of complex structures and shapes by depositing material layer by layer.

3D printing technology is now rapidly growing and used for manufacturing of complex products used in various applications fields.

This paper take a look on 3D printing technology and its application in different fields. This paper helps to get the review on applications of 3D printing technology.
