**Abstract:** *The "Two-Way Sign Language Translator" represents a state-of-the-art technological innovation crafted to overcome the communication barrier between individuals adept in sign language and those lacking proficiency in it. This significant engineering endeavor endeavors to construct a pioneering system that enables seamless, instantaneous, and bidirectional translation between sign language and spoken language. The principal goal is to fashion an accessible and inclusive communication apparatus that fosters improved interactions and comprehension between individuals who are deaf or hard of hearing and the wider hearing community.*

**Keywords:** Two-Way Sign Language Translator
