Pimpri Chinchwad Polytechnic, Nigdi, Pune, India

Abstract: *The Institute Finder platform, developed with Django, is a comprehensive web-based application designed to assist students in making informed academic choices. It features interactive tools such as a Counsellor AI that provides personalized academic advice, a Mock Test module for entrance exam preparation, and advanced search functionalities to explore colleges and courses based on location, ranking, and user preferences. The platform leverages AI to enhance the academic planning experience, offering tailored guidance and simplified decision-making for students across various educational levels.*
