

Artificial Intelligence Application for COVID 19 Pandemic

Dr. Mamta Sharma

Assistant Professor, Department of Commerce
Kishan Lal Public College, Rewari, India

Abstract: *Since the last few months the world is experiencing an outbreak of COVID-19 pandemic that generally follows a similar path consisting of following phases: the first phase involving a very few people suffering from the infection and only a limited number of response, which is then followed by the next phase involving a take-off in the epidemic curve along with a national lockdown done in order to flatten the curve. Amidst all this, governments across the world are burdened by the question as to when and how to manage de-confinement.*

Keywords: Artificial Intelligence
