

‘Mathematics’ The Backbone of Civil Engineering

Assistant Prof. R. R. Oka.

M.Sc. SET, B.Ed.

Abstract: *Mathematics is known as language of Engineers. Mathematics plays a crucial role in engineering. Mathematics serves as the backbone on which engineers develop and utilize their expertise to address and solve practical, real-world challenges. Here are some key points which will describe the utmost importance of mathematics in Civil Engineering*

Keywords: *Mathematics.*
