Abstract: *Herbs have long been used as medicine, and more recently, they have been incorporated into cosmeceutical formulations, which are a vital part of the healthcare system. This review focuses on Tridax procumbens' ability to heal wounds. Tridax procumbens The Asteraceae family includes the plant linn, which has long been utilized as an ayurvedic herb in Asia. In traditional medicine, Tridax procumbens has been used to treat wounds, skin conditions, and blood clotting. Additionally, it possesses a number of pharmacological properties, including hepatoprotective, anti-inflammatory, antidiabetic, hypotensive, immunomodulatory, and dysentery properties; it also inhibits hair loss, encourages hair growth, and exhibits antimicrobial properties against both gram-positive and gram-negative bacteria.*
