Abstract: *Many new entrepreneurs face difficulties turning their ideas into successful startups due to a lack of proper direction and real-time insights. FoundrOS – AI-Powered Startup Builder Dashboard is designed to make this process easier by offering an intelligent digital platform that supports founders at every step — from validating their ideas to preparing funding plans. The system uses artificial intelligence to generate personalized startup roadmaps, analyze markets and competitors, and suggest essential MVP features. Built using the MERN stack, it ensures flexibility, speed, and smooth performance. FoundrOS also includes an interactive AI chatbot and dynamic tools that help users make better decisions quickly. By combining modern web technologies with AI, FoundrOS empowers innovators to plan, build, and grow their startups with confidence and clarity.*
