**Abstract:** *Women entrepreneurship has emerged as a key driver of economic growth, job creation, and social development. In India, women-led micro, small, and medium enterprises face significant challenges, particularly financial constraints, limited access to credit, and societal barriers. However, they also have substantial growth opportunities through government schemes, technological adoption, and market diversification. This review aims to analyze the financial hurdles and growth prospects for women entrepreneurs in the MSME sector, highlighting trends, challenges, and strategies for sustainable development.*

**Keywords:** Financial Constraints, Access to Credit, Collateral Requirements
