Third Semester Student Scholar, Department of Computer Science Engineering,  
Alva's Institute of Engineering and Technology, Moodabidire, Dakshina Kannada, Karnataka, India

**Abstract:** *This study examines natural language processing (NLP) from the late 1940s to the present, with the goal of identifying trends that reflect concerns about various difficulties or the development of various approaches to solving these problems and constructing systems as a whole. In this we will also know about Natural Language Processing is the practice of teaching machines to understand and interpret conversational inputs from humans. NPL based on machine learning can be used to establish communication channels between humans and machines.*

**Keywords:** Natural Language Processing
