Abstract: *This project presents the development of an Online Shopping Website that allows users to browse, select, and purchase products conveniently through a web-based platform. The system includes features such as user authentication, product search, shopping cart, and secure checkout. An admin module is provided to manage products, users, and orders efficiently. The website is designed to be user-friendly, responsive, and secure, ensuring a smooth shopping experience. This project demonstrates the practical application of e-commerce technologies in improving accessibility, efficiency, and customer satisfaction.*
